NZ ORCID Consortium Newsletter #29

In this issue of the New Zealand ORCID Consortium newsletter:

ORCID Global Town Hall Summary

The ORCID Global Community Town Hall took place on 20th March 2024. The ORCID Inc senior management team shared details of the progress made in 2023 and provided a preview of the plans for ORCID in 2024. These plans include supporting a greater diversity of work types, the creation of export wizards and increasing global participation in ORCID. A full recording of the meeting and the associated resources can be found on the ORCID events page.

NZ ORCID Hub Workshop Recording

Thank you to those members who attended the recent NZ ORCID Hub Workshop. A recording of the event and the PowerPoint slides can be found on our website. This workshop provided information about the NZ ORCID Hub and focused on the main functions and benefits of the tool. We also discussed some current active use cases. Contact orcid@royalsociety.org.nz if you have any questions about the recorded content.

CONZUL Open Access Toolkit

A new Open Access Toolkit for Aotearoa New Zealand researchers has been created under the direction of the Council of Aotearoa New Zealand University Librarians (CONZUL), a committee of Universities New Zealand. The toolkit is designed to guide researchers through the process of ensuring their research articles are published Open Access. The process is split into five stages of publishing: planning the research, selecting a journal, submitting the manuscript, on acceptance and after publication. One of the key steps discussed in the Open Access Toolkit is signing up to ORCID and adding the published article to your ORCID record. ORCID Search and Link Wizards can be used to support the researcher in doing this.

Weltec & Whitireia Research Seminar Series

A Royal Society Te Apārangi representative recently delivered a presentation at the Weltec & Whitireia Research Seminar Series. The session included a presentation to attendees which focused on the benefits of ORCID membership for researchers and examples of the ORCID work that can be undertaken in the ITP sector. Contact orcid@royalsociety.org.nz if you would appreciate similar ORCID promotion at your own staff event or conference.

NZ ORCID Consortium Drop In Event

If you have a question that is too complex for an email or want to know what a particular ORCID integration can do, then the next ORCID Consortium Drop in Event will be the perfect opportunity to drop-in and chat to the Royal Society Te Apārangi ORCID Lead about new ideas and plans. An invite and sign-up form will be circulated soon for the next drop-in session, which will be held on Wednesday 1st May at 10 –11:30am.

ORCID and GitHub Partnership

ORCID is delighted to announce a collaboration with GitHub to build awareness and encourage the use of ORCID IDs by researchers and organizations who are part of the GitHub programming community! Follow this link to find out more.

ORCID Global 2023 Annual Report

The ORCID Global 2023 Annual Report has been released. This year was the second full year of ORCID's current strategic plan, From Vision to Value: ORCID's 2022–2025 Strategic Plan, and

progress has been made towards the four priorities that were defined in 2021. These priorities are: Increasing Value to Members, Increasing Value to Researchers, Increasing Global Participation, Upholding Trust and Integrity. In addition, in 2023 Improving Staff Experience was added as a fifth theme.

Registry Updates prompt Affiliation addition

A new release from ORCID now makes it easier for researchers to populate their ORCID record right from the beginning! Now when a new user registers, they will be prompted to add an employment affiliation either manually, or from a suggestion based on the email domain being entered. This will ensure that more users' records include an accurate affiliation.

ORCID webinars

ORCID have launched the [ORCID On-Demand](#) service which allows users to catch up on webinars anytime. This is particularly useful for any webinars that fall outside of our time zone. The recent ORCID webinar series such as the Enabling Value series and the I'm a Member, Now What series are hosted on the ORCID On-Demand site.
