Aim: To develop a low sugar custard to prove that products contain an unnecessary amount of sugar.

Product Attributes:
• Low sugar
• No artificial colours
• Contains calcium

Iterative Processes:
• Deciding on a product to develop
• Researching and trialling the current products on the market
• Testing and trialling followed with feedback
• Gathering information based on tests, trials and feedback
• Developing and refining product
• Final product

Final Product: A low sugar custard

Challenges Faced:
• Getting the desired flavour
• Getting the desired consistency
• Determining the best way to approach these challenges

Overall Enjoyment
